NEW LOGO MALOSSI

We are proud to officially present our **new company logo** the result of a year of work dedicated to the restyling of our brand image which has always contained the fundamental elements of Malossi's DNA: **energy, modernity, passion** and **Italian style**.

These values, Michele Enko Costa explains, have inspired the methods used during the restyling.

"The new font, spacing and its equilibrium were my starting point when making structural improvements. Creating a new brand which expresses the determination and experience of a historic company had to be my objective. Designing new lines, using new colours, creating a unique symbol, whilst maintaining the fundamental characteristics of a legendary marque."

In deciding the final logotype, Malossi's strong personality was analysed in full, **as an source of great interest for observers and enthusiasts of the sector from 1980 to 2015**.

By studying in depth the evolution of the company image with the intention of conveying the same passion that the company uses in its daily work has produced a final result which is a perfect compromise between modernity and tradition.

Our lion, a symbol of courage and nobility, strength and caution, reappears in a new setting, whilst retaining the principles which led to the choice of this symbol in the first place.

"Decisive and winding lines, Enko explains, are a complete re-design of the new figure - giving a determined and contemporary image, and moving away from the classic iconography used up until now"

The Malossi Lion has been renewed, and is full of passion and modernity.

Our company and our roots haven't changed: and nor has our vision for the future!

And the story continues...

The brand's experience and determination are key to its restyling.

POWER CAM camshaft
5914657 € 216,30

These new camshafts were created by exploiting Malossi experience and technical know-how in designing and building special parts for tourist and sports use. The camshafts were designed with the Cad-Cam system, built with very high precision machinery, and controlled 100% by measuring instruments with precision capability down to a tenth of a micron. These components are true mechanical jewels. The Malossi camshaft was designed and constructed to give your scooter a markedly sporting feel enabling you to easily manoeuvre through town traffic and tackle long distances at high cruising speeds. The considerable increase in torque will boost your acceleration and climbing power in a big way.

Over 15% increase in power

Specifications

- Bore: Ø 70 mm
- Stroke: 73 mm
- Displacement: 560 cc
- Compression Ratio: 1:12 Max.
- HP @ 7800 RPM
- Twin Cylinder Single Block: Special Al-Si-Cu alloy, hardened and stress relieved
- Cylinder liners: Cermet (Ni-Ca-Sil) coated and machined with extreme precision in our state of the art work cells
- Cross-honed at 110°/130°

(*) Also for vehicles 2004-> 2007 with hydraulic chain tensioner**FORGED PAIR OF PISTONS Ø 66 PIN Ø 15 WITH 3 PISTON RINGS FOR ORIGINAL CYLINDER****3413706 - 2004-> 2011 € 343,20**

Forged Pistons: Special Al-Si-Cu alloy, hardened, shaped crown with valve reliefs, racing design, reinforced and lightened with constant wall thickness.

**MAXI WILD LION****HOMOLOGATED****3214130 - 2008-> 2011 € 683,40****3212721 - 2001-> 2007 € 499,01**

- European homologation
- Elliptical cross-section casing made of stainless steel with laser marked logo
- Carbon end caps
- Silencer system with the addition of sound absorbing mineral fibers, possessing high noise damping and nondegrading qualities.
- Equipped with DB killer
- Stainless steel exhaust tubes from the cylinder or to the silencer.

WHOOOP DISC rear brake disc**6213319 € 129,50****BRAKE PADS MHR SYNT****rear homologated - 2004-> 2011****6215026 € 18,72****SPRING PRE-LOAD REGULATION KIT FOR ORIGINAL FORK****2015460 - 2008-> 2011 € 147,46**

Technical features

- Extremely light, completely made of 6000 series aluminium alloy (with magnesium and silicon)
- Range of the preload adjustment plug: -5 / +25 mm
- Laser engraving on the plug with hard oxide coating for an even easier adjustment
- Tube made of 6000 series aluminium alloy (with magnesium and silicon), extremely light, with blue cobalt anodic oxidation

RS24 REAR SHOCK ABSORBER**4613598 € 830,00**

Technical features

- Oil-gas suspension with pressurized nitrogen chamber;
- Hydraulic adjustment in expansion;
- Patented adjustment of the spring pre-load;
- Adjustment of the vehicle setting;
- Stroke 48 mm;
- Adjustment system of the scooter setup, with fit shock absorber.

**T-Max****SUSPENSION BRACKET 25+****1813205 € 196,10**

Shock absorber bracket kit for racing setting. Optimization in bend entrance, reached thanks to 25 mm raising of the vehicle rear part, is the remedy that grants greater stability to vehicle and, moreover, it contrasts the problem of ground impact.

Note: suggested setting example, please check in the following brand/model tables the items suitable for your vehicle.

**Intake valves:**

- Bigger Ø from 25 mm to 26.5 mm
- Special steel for high performance valves
- Hardened stem tip to ensure highest resistance and life of the contact area

Válvula de Escape:

- Bigger Ø from 22 mm to 23.5 mm
- Nickel-based superalloy - NIMONIC 80 - resistant to very high temperatures
- Precipitation hardened material with Rm. 1400 N/mm

4 STROKE VALVE 2715092 € 164,80

Completely refaced valve, valve stem surface with hard chrome coating, valve surface finish, isotropic finishing.

**DOUBLE POWER CAMME****5913783 € 790,00**

Malossi's Double Power Camms are fine-tuned to generate an optimum and progressive power increase if matched with original cylinder or an exponential increase in power if matched with Malossi's 560 cc big bore twin cylinder set.

MHR SCREEN**4515361 - 2001-> 2007 € 63,00****4514012 - 2008-> 2011 € 63,00****HOSE KIT (front/rear)****for MHR BRAKE (AERONAUTICAL)****2214135 - 2008-> 2011 € 180,00****2213103 - 2004-> 2007 € 175,00****BRAKE PADS MHR SYNT front homologated****2004-> 2007****6215029 € 17,16****2008-> 2011****6215022 € 17,68****WHOOOP DISC COUPLE front brake disc****6213715 - 2008-> 2011 € 274,00****6216320E - 2004-> 2007 € 237,50**

The "WHOOOP DISC" paired with Malossi BRAKE PADS guarantee a progressive and secure braking even under extreme conditions.

MAX 500

RED CHILLI OIL FILTER**0313639 € 7,64****Technical Characteristics**

- Quality of the filtering media, unalterable in time, and insensitive to rapid temperature changes starting at 20°C below zero to the most elevated operational temperatures.
- Ability to filter infinitely small metallic particles and trap a greater quantity of harmful larger contaminants, in virtue of the special micro-porosity filtering media itself and its high capacity.

**W BOX FILTER****1413703 - 2001-> 2007 € 49,00****1414213 - 2008-> 2011 € 49,00****Technical Characteristics**

- High air flow
- Multilayer long fibre cotton gauze, oiled, and sandwiched between two epoxy-coated aluminium wire screens. Encased in a polyurethane frame, 30 ShA, insuring an excellent seal
- Washable and reusable

**V FILTER****0414614 € 41,36****Technical Characteristics**

- High air flow
- Multilayer long fibre cotton gauze, non-oiled, and sandwiched between two epoxy-coated aluminium wire screens. Encased in a polyurethane frame, 30 Kg/m3 adhesive based, insuring an excellent seal
- Washable and reusable

POWER TRANSMISSION MHR z 26/40**6714757 € 265,00**

HTQ Z 26/40 pinion and ring gear pair with lengthened gear ratio, Malossi Morse lightened, narrower, frictionless racing chain. This system completely replaces the original primary gears (25-tooth pinion and 41-tooth ring gear) with a 26-tooth drive pinion and a 40-tooth driven ring gear, thus providing a 7% longer ratio. Besides providing this longer ratio, these gears are narrower, as to fit the new Malossi Morse racing chain, which is frictionless and without friction springs, thus lighter, more sliding and with higher resistance and long life compared to the original one, since "you can't break what is missing".

**HTQ Z 26/40 pinion and ring gear pair**

- 1) Toothed ring gear pair with narrower walls, consisting of one 26-tooth drive pinion and one 40-tooth driven ring gear, made in Cr Ni Mo 5 alloy steel, tempered and case-hardened, manufactured basing on Malossi design with high precision machine tools.
- 2) Tooth profile designed for maximum resistance and minimum noise.
- 3) Tooth contact surfaces provided with maximum finish to ensure very long life and operating reliability.
- 4) High-standard inspections on each component, from raw materials to the finished product, ready for sale.

Malossi Morse Racing chain

Narrower chain, designed to eliminate the lateral friction of the original chain.

NB: we recommend not to modify Malossi Morse racing chain, art. 6114474B, in order to fit the original or other manufacturers' pinion and ring gear pair. Malossi does not assume any responsibility, thus won't recognize any warranty in case of damage.

**POWER TRANSMISSION SPORT - z 26/40 for original chain****6714418 € 148,00**

Gear sets which lengthen the pitch of about 7%. This Sport version must be used only with the original chain since Malossi racing chain is narrower and it doesn't accept original or similar ring gears.

**DISK SET
for original clutch
5215401 € 89,00**
**FORCE MASTER 2 - electronic controller (injection)****5514756 - 2008-> 2011 € 255,84****5514854 - 2004-> 2007 € 255,84**

Force Master 2 is the innovative CDI which allows to change the injection in order to fit perfectly the new Malossi 4-stroke cylinder kit.

This CDI has been scheduled with 4 different maps so as to be coupled perfectly with your vehicle whatever its setting is.

Maps were scheduled at the static test bench, thus simulating the real load of the engine, as if it were on the road. This allowed us to get a very refined carburetion, similar to the original one!

Technical features

- Carburetion adjusting
- $\pm 20\%$ at min/medium/max
- RPM limiter shifted to 9500 RPM
- 4 different maps
 - Curve 0 : original twin-cylinder, original camshaft, Malossi exhaust system, Malossi air filter
 - Curve 1 : Malossi pistons $\varnothing 66$, Malossi camshaft, Malossi exhaust system, Malossi air filter
 - Curve 2 : Malossi twin-cylinder $\varnothing 70$, original camshaft, Malossi exhaust system, Malossi air filter
 - Curve 3 : Malossi twin-cylinder $\varnothing 70$, Malossi camshaft, Malossi exhaust system, Malossi air filter

**TC UNIT O₂ controller - lambda emulator****5514747 - 2004-> 2011 € 84,00**

We suggest to use the O₂ controller to further optimize both carburetion and performances in transistors. In latest generation motorcycles, thanks to lambda sensor, the CDI can rectify the fuel quantity to be injected in order to reach a constant carburetion even in Closed Loop area. The O₂ controller permits to totally control the carburetion as to obtain the best air/fuel ratio. Malossi Lambda emulator is a device able to simulate signals from lambda sensor which original CDI is expected to receive. In this way, original lambda sensor is used to obtain best carburetion without the original CDI noticing failures or mistakes.

Note: suggested setting example, please check in the following brand/model tables the items suitable for your vehicle.

Transmission system

- Improved shifting consistency
- Hard anodized - black
- Modified roller guides to allow greater operational linearity while maintaining maximum power
- Case-hardened and ground machined steel sliding bushing
- Hardened, ground machined, chromed steel hub- New one-piece rollers with a better performing compound
- Supplied with two different roller sets and two shims in order to change the number of revolutions of the gear curve of your vehicle perfectly adjusting its speed and acceleration

VENTILVAR 2000

6113806B € 64,88

The fixed half-pulley features a diamond finish of the belts side pulley surface and a redesigned working angle to further increase the gearing range. This component completes the Multivar and renders it unparallelled!

TORQUE DRIVER

6113495 € 202,98

Mobile driven split pulley.

The spiral section is made of the finest steel; nitride surface hardened, the pulley is made of diamond finished aluminium, riveted to guarantee the highest rigidity.

The spiral section's special form was fine tuned to maintain constant engine speed at peak horsepower.

TORSION CONTROLLER

2514227 € 45,00

Antifriction fifth wheel for variator contrast spring.

VARIABLE-SPEED DRIVE

RACING CLUTCH SPRING

2913327 € 18,39

Pre-hardened carbon steel springs for original clutch, with high yield strength, galvanically treated for extended protection.

The different coloring indicates the load capacity of each spring series.

The spring kit permits up to a 500 rpm clutch engagement with 150 rpm increments per spring type.

T-Max 500

OVER RANGE - 6115472 € 493,68

TORQUE DRIVER

6115289

€ 209,10

The mobile driven split pulley comes from our racing department's many years of experience, and is manufactured with the best possible special nitrided steels in order to ensure a long life.

This component called Torque Driver for its specific function of determining the exact shifting moment, was calculated to give the vehicle the maximum possible acceleration in connection with the specific power of any single engine. The spiral's peculiar shape was studied to fix the RPMs on the point of maximum power.

Products to be used exclusively for racing in places specially designed for such activity according to the regulations of the competent sporting authorities. We accept no liability resulting from improper use.

T-Max

BRAKE PADS MHR SYNT rear homologated
6215030 € 18,75

VENTILVAR 2000

6115285B € 64,88

New fixed half-pulley, larger external diameter (186 mm, +3 mm compared to the original one), redesigned working angle (13°) and diamond finish of the belt-side pulley surface to further increase the gearing range! This component completes the Multivar and renders it unparalleled! Suitable even to original variator.

SPRING PRE-LOAD REGULATION KIT FOR ORIGINAL FORK

2015460 - 2012->2014

€ 147,46

Technical features

- Extremely light, completely made of 6000 series aluminium alloy (with magnesium and silicon)
- Range of the preload adjustment plug: -5 / +25 mm
- Laser engraving on the plug with hard oxide coating for an even easier adjustment
- Tube made of 6000 series aluminium alloy (with magnesium and silicon), extremely light, with blue cobalt anodic oxidation

Note: suggested setting example, please check in the following brand/model tables the items suitable for your vehicle.

MULTIVAR 2000 MHR**5115470 € 188,49**

- Widened gear range (especially short gear).
- Improved shifting consistency.
- Hard anodized black.
- External diamond fins.
- Modified roller guides to allow greater operational linearity while maintaining maximum power.
- Case-hardened and ground machined steel sliding bushing.
- Hardened, ground machined, chromed steel hub.
- New one-piece rollers with a better performing compound.
- Supplied with two different roller sets in order to change the number of revolutions of the gear curve of your vehicle perfectly adjusting its speed and acceleration.
- Equipped with sliders.
- One shim included into the kit

**MHR SCREEN****4516328 € 67,00****RACING SPRING SET****2915602 € 18,39**

Pre-hardened carbon steel springs for original clutch, with high yield strength, galvanically treated for extended protection.

The different coloring indicates the load capacity of each spring series.

The spring kit permits up to a 500 rpm clutch engagement with 150 rpm increments per spring type.

Silicon-steel springs with high carbon content, heattreated, dynamically balanced, kiln painted and designed and calculated for each specific application.

**WHOOOP DISC COUPLE
front brake disc****6216320E € 237,50**

The "WHOOOP DISC" paired with Malossi BRAKE PADS guarantee a progressive and secure braking even under extreme conditions.

x 530

RS24 REAR SHOCK ABSORBER**4613598 € 830,00**

Technical features

- Oil-gas suspension with pressurized nitrogen chamber;
- Hydraulic adjustment in expansion;
- Patented adjustment of the spring pre-load;
- Adjustment of the vehicle setting;
- Stroke 48 mm;
- Adjustment system of the scooter setup, with fit shock absorber.

**TORSION CONTROLLER****2514227****€ 45,00**

Antifriction fifth wheel for variator contrast spring.

**New****MAXI WILD LION HOMOLOGATED****3216407 € 670,00**

- European homologation
- Elliptical cross-section casing made of aluminium with black anodized finish and laser marked logo
- Carbon end caps
- Silencer system with the addition of sound absorbing mineral fibers, possessing high noise damping and nondegrading qualities.
- Equipped with DB killer
- Stainless steel exhaust tubes from the cylinder or to the silencer.

**RED CHILLI OIL FILTER****0313639****€ 7,64**

Technical Characteristics

- Quality of the filtering media, unalterable in time, and insensitive to rapid temperature changes starting at 20°C below zero to the most elevated operational temperatures.
- Ability to filter infinitely small metallic particles and trap a greater quantity of harmful larger contaminants, in virtue of the special micro-porosity filtering media itself and its high capacity.

W BOX FILTER**1414213****€ 49,00**

Technical Characteristics

- High air flow
- Multilayer long fibre cotton gauze, oiled, and sandwiched between two epoxy-coated aluminium wire screens. Encased in a polyurethane frame, 30 ShA, insuring an excellent seal
- Washable and reusable

V FILTER**0415216****€ 42,57**

Technical Characteristics

- High air flow
- Multilayer long fibre cotton gauze, non-oiled, and sandwiched between two epoxy-coated aluminium wire screens. Encased in a polyurethane frame, 30 Kg/m³ adhesive based, insuring an excellent seal
- Washable and reusable

Note: suggested setting example, please check in the following brand/model tables the items suitable for your vehicle.**T-Max**

**TC Unit O₂ controller
lambda emulator**
5515720 € 84,00

We suggest to use the O₂ controller to further optimize both carburetion and performances in transistors. In latest generation motorcycles, thanks to lambda sensor, the CDI can rectify the fuel quantity to be injected in order to reach a constant carburetion even in Closed Loop area. The O₂ controller permits to totally control the carburetion as to obtain the best air/fuel ratio.

Malossi Lambda emulator is a device able to simulate signals from lambda sensor which original CDI is expected to receive.

In this way, original lambda sensor is used to obtain best carburetion without the original CDI noticing failures or mistakes.

DOUBLE POWER CAMME
5915981 € 826,00

Malossi's Double Power Cams are fine-tuned to generate an optimum and progressive power increase if matched with original cylinder or an exponential increase in power if matched with Malossi's 560 cc big bore twin cylinder set.

Bi- Cilindro 4-stroke 560 cc.

3115423 € 690,00

- Increase in power
- Extreme reliability.
- "Made in Italy" Technology.
- Designed and manufactured in the Calderara di Reno, Italy facility
- Malossi's engineering staff gave special attention in all phases, from design to manufacturing, as with all the products displaying this trademark.

Yamaha's clean design single block, twin cylinder was modified by Malossi with significant changes and updates that allowed a substantial bore increase without compromising the original mechanical and thermal integrity. Of particular interest are the pistons, which are forged using a special alloy, analysed, and designed to withstand the working stresses due to extended use. Nothing was left to chance, from the gaskets to the lightweight, taper bore, high alloy steel gudgeon pin to the chromed plated and gas nitride steel piston rings. Every detail is a precious contribution in creating a very exclusive cylinder/piston set: a product for a discerning and well-informed customer!

Specifications

- Bore: Ø 70 mm
- Stroke: 73 mm
- Displacement: 560 cc
- Compression Ratio: 1:12 Max.
- HP @ 7800 RPM
- Twin Cylinder Single Block: Special Al-Si-Cu alloy, hardened and stress relieved
- Cylinder liners: Cermetal (Ni-Ca-Sil) coated and machined with extreme precision in our state of the art work cells
- Cross-honed at 110°/130°

- Ø 70 forged pistons, pin 15 with 3 piston rings: special Al-Si-Cu alloy, hardened, shaped crown with valve reliefs, racing design, reinforced and lightened with constant wall thickness.

Piston Rings (3):

- 1st - Compression Ring: Chrome plated steel.
- 2nd - Intermediate Ring: Phosphate coated steel.
- 3rd - Oil Control Ring: 3-piece oil ring, (chrome plated steel rails, plus spring).

Note: suggested setting example, please check in the following brand/model tables the items suitable for your vehicle.

1616722 € 750,00

More power for the T-Max

The most powerful engines require an adequate and constant supply of fuel. Increasing the performance of the Yamaha T-Max, drawing from the extremely complete Malossi catalogue, has made it essential to build a specific throttle body able to ensure a performance that is unthinkable for the standard unit.

Made of black anodized 7975-T6 aluminium, the MHR throttle body has been designed specifically to achieve maximum efficiency in combination with the 560cc Malossi twin cylinder kit and with the Double PowerCam, providing the right intake to the engine in this configuration.

The inner diameter of the throttle body is widened to 38mm, while its length remains identical to the original so that it can be placed without difficulty in its standard position between the head and the airbox.

Its inner ducts are cylindrical near the horns, to become progressively oval-shaped in correspondence of the butterfly valve. Thanks to this variation of internal shape, the fresh gases are pushed with more energy towards the head which, featuring two intake valves, requires a significant width, offered by the oval section that continues to the end of the manifold.

The two manifolds supplied with the kit are oversized and can be installed only on a worked head without requiring further modifications. The specific horns for the MHR throttle body are calculated and optimized to achieve the maximum yield from the oval sections of the bodies, exploiting the perfect harmonization of the entire duct.

Use	Racing

Art. 5512894

€ 210,11

This ECU (Electronic Control Unit) converts your fuel injected vehicle into a carburettored vehicle. In addition to the ECU, a carburettor and a specific cylinder and head, designed for a carburettor, are required (see articles in the red frame -->).

An amazing development

The first Electronic Control Unit (ECU) capable of converting a fuel injection system into a carburettor system has been developed:

DIGITRONIC K.R.M.

As of today, with K.R.M, it is possible for any 50cc two-stroke fuel injected scooter to utilise a vast assortment of Malossi carburettor-based products. You can have a racing scooter with winning potential and even participate in the Trophy Series Malossi sponsors in all Europe.

The kit Digitronic K.R.M. consists of an ECU and mounting hardware. The ECU simply substitutes the original ECU and is connected to the existent wiring. No other modifications are required.

The ECU K.R.M. has been developed by a team of Malossi engineers, with the goal to create a product capable of guaranteeing the maximum satisfaction from our most demanding customers!

NOTE:

now your vehicle will be identical to a carburettored vehicle, in which you can install any spare part made for such vehicles (see the following comparative tables).

SCOOTER RACING
MHR BIG BORE Ø 52****3216158 € 366,18****BRAKE POWER****rear brake shoes****6215328 - 1996-> € 18,39**

Made of a special aluminium-magnesium alloy and a special asbestos-free friction material, in compliance with new EEC regulations.

**RS24/10-R shock absorber pair****front / rear****4614479 € 814,98**

- Oil-gas suspension with variable setting and extension/compression adjusting, compensated for a pressurized nitrogen chamber.
- Extension adjustment in order to absorb the harshness of the ground;
- Double adjusting of hydraulic system in compression (separated according low and high speed);
- Spring pre-load allows to fit the vehicle while driving;
- System of setting variation as regards the behavior in bends.

MHR TEAM INNER ROTOR IGNITION

5515001 € 350,00

- Variable advance
- Microprocessor control.
- S.M.T. assembly technology.
- Constant 30,000 V discharge voltage up to 20,000 rpm.
- Available spare parts controller DIGITRONIC-TRIMMER

OVER RANGE MHR ALUMINUM - PIAGGIO 2000

6115781 - 2001-> € 365,00

Kit Over Range MHR Aluminum Malossi - High Performance Scooter Transmission

DELTA CLUTCH

52 7880 € 77,89

Automatic clutch with variable adjustments

FUEL TAP

6511990B € 21,35

Fully aluminum RACING tap with violet anodized screw opening/closing knob. Ø 15 mm inserting to tank with blocking clamp. Ø 9 mm inserting petrol pipe

WING CLUTCH BELL Ø 107

7714147 € 90,00

Forged clutch bell, without welds, made of 39NiCrMo5 steel, nitrogen surface hardened with an antioxidant surface treatment. Machined finned reinforcement corona enhances heat dissipation, protecting the clutch's friction material, tested to over 20,000 RPM.

MHR RADIATOR

7115431 - 2001--> € 626,00

7115430 - <-2000 € 634,00

Malossi MHR Team radiators are made with radiant packs having an increased surface, capable of ensuring a high-efficiency thermal exchange by maintaining a cooling liquid temperature within an optimal range, even in the most heavy-duty conditions.

ENERGY PUMP

C-ONE

Crankcase

for all scooters that fit a Piaggio LC 50 cc engine as original equipment

MHR C-ONE was conceived and designed to:

- Fit both drum brake and disc brake.
- Replace the original engine both with short and long wheelbase. The position of the shock absorber fixing has been designed to satisfy both options.
- Install both cylinders with stud bolts and cylinders with flange fixing.
- Use an electric cooling pump to eliminate the power consumption of the traditional mechanical water pump.
- Eliminate the automatic mixer.
- Install the vacuum fuel pump.
- Install the new bigger reed valve, designed using sophisticated programs of 3D fluid-dynamics simulation.
- Hold all current Malossi products.

Malossi is changing the rules of the game and is once again raising the performance level for modern racing scooters.

The result of extreme choices, the C-One housing marks a radical departure from the traditional structure of the scooter it is designed for and finally provides a technically advanced structure that is ready for installation of the latest generation of racing components.

Until now, racing scooters could be fitted only with the original engine housing, designed to withstand a handful of horsepower and adapted to cope with the stress of competition with 70 cubic centimetre engines and about 26 horsepower.

Today, on the other hand, Malossi, the innovation leader, turns the tables, proudly presenting its international public with the C-one motor housing.

Designed and produced in the Malossi facility in Calderara di Reno, one of the most advanced centres for the research, development and production of special parts for motors and scooters, Malossi's dream to produce the most innovative racing parts ever for scooters takes shape in the C-one.

It started with the elimination of automatic mixers and the traditional mechanical water pump to maximize dispersion reduction. They continued, creating the preparation for installation of a rear disk and drum brake system and adding the possibility of using a vacuum fuel pump.

The seat for the reed valve was considerably changed. By taking advantage of all of the possibilities offered by modern 3D fluid dynamics simulation software, Malossi technicians were able to identify the ideal size and dimensions.

As if it had to draw the ideal engine housing on a blank piece of paper, completely detaching itself from the past, Malossi introduced a hole next to the positions in the original housings for stud bolts that can be used by the new creations in the thermal units in the Team Factory family, with flange and short stud attachment. This solution makes it possible to design totally original cylinders. Build a new engine, customize your racing scooter, choose from the Malossi catalogue the most prestigious parts!

We will be ready to provide whatever technical assistance may be needed!

Mounting cylinders with stud bolts.

Transfer ports perfectly coupled to the Malossi MHR Team 7 cylinder kits transfer ports.

Cylinder housing boring \varnothing 61 mm.

Cylinder mounting to Malossi flange.

Ready for user with original Malossi roller crankcase 2514603 MHR / original.

Preparation for depression fuel pump.

Ready for use with starter casing cover Gilera Runner 50 2T.

Elimination of automatic mixer.

Larger needle bearing \varnothing 16 x 22 x 12.

Larger single-petal reed valve Malossi VL18.

Ready for brake caliper installation.

Installation slots internal rotor ignition.

Pump casing boring \varnothing 73.

Ready for brake shoe mounting.

Bearing housing \varnothing 47.

Products to be used exclusively for racing in places specially designed for such activity according to the regulations of the competent sporting authorities. We accept no liability resulting from improper use.

C-ONE

youtu.be/ksc1YhJGX8I

Crankcase

for all scooters that fit a

Yamaha Minarelli LC 50 cc engine as original equipment

Malossi has achieved the impossible, uniting the world of racing motors for scooters to the C-One Yamaha-Minarelli.

Our technicians have designed the C-One Yamaha-Minarelli as a platform for bringing together the technical solutions as well as the internal external dimensions with all C-One Malossi models.

Malossi C-One uses the same heating unit and transmissions on all of its models, both for Piaggio and Yamaha/Minarelli scooters, linking two worlds which have always been apart by enhancing and giving value to the best elements of both.

C-One for Yamaha has been designed to be entirely Plug & Play for all scooters equipped with 50cc Yamaha/Minarelli liquidcooled motors: no modifications to the chassis are required, and the internal section can accept all products in the Malossi selection for the RC-One range, becoming a revolutionary solution for the development of racing components for ALL scooters

THE TECHNIQUE

The base of the cylinder has been inclined by 10° compared to the original drive shaft axle - gears.

This innovative development has allowed Malossi technicians to connect the motor attachments in front of the power unit, doing away with one of the biggest Achilles heels once of standard Yamaha/Minarelli motor housings once and for all. A modification underneath the saddle compartment.

The base of the C-One Yamaha-Minarelli requires two different stud mounts in order to house either Malossi cylinders with through-hole studs or flanged mount short studs with 47.6 max. diameter. The advantage of this solution is that it opens the door to entirely unique cylinder designs.

The reed valve mount has been significantly changed thanks to the latest 3D fluid dynamics simulation software, allowing Malossi technicians to find the ideal ratios and dimensions. The automatic mixer and mechanical water pump have been removed to reduce dispersion as much as possible.

The possibility to perform a native install of a Malossi internal ignition rotor has been allowed, as well as a vacuum fuel pump. As for the bike itself, C-One for Yamaha is designed exclusively for scooters with rear disc brakes fitted as standard, and is not designed for the alternative use of brake shoes.

The interaxle spacing has been increased, with a consequential increased stability and precision when taking curves, whereas the gearbox housing has been reduced in size by overlapping the gear wheels. The increased interaxle spacing and the internal diameter means that the starter cover designed for Piaggio scooters is required. All C-One for Yamaha housings are supplied complete with the components required for installation.

Indeed, considering the notable technical differences when compared to standard units, Malossi has decided to include a reed valve, covers, and a special wheel pin in order to use the original rear wheel and make the C-One perfectly interchangeable with Yamaha/Minarelli wheels and hubs.

Another optional is the special rear mudguard to protect and keep the carburettor clean, now positioned at the rear. The new housings have been designed and built in Calderara di Reno at Malossi's new headquarters, one of the most advanced centres for research, development and production of special parts for motors and scooters.

These parts were thought of and produced with one objective: to produce the most innovative racing components for scooters ever.

RC-ONE

This crankcase has been dreamed of and brought to reality with just one aim in mind: to produce the most innovative racing component for scooters that has ever existed.

Crankcase for all scooters that fit a **Piaggio LC 50 cc engine as original equipment**

5715845
€ 470,00

A revolution cannot be considered as such, if it does not involve a radical change. That's the reason why Malossi decided to go beyond the C-One crankcase, thus realizing RC-One, an even more extreme version dedicated to those who love high-powered engines.

With the release of RC-One crankcase as well as the new MHR Flanged Mount cylinder, the engine capacity achieves 94 ccs and the power largely exceeds 30 hp, without any problems of boring or resistance involving the engine block.

RC-One is designed to use exclusively Malossi cylinder with flanged mount; inside it has a housing of such dimensions as to allow the installation of long-stroke crankshaft without any further modification.

MHR C-ONE was conceived and designed to:

- Fit both drum brake and disc brake.
 - Replace the original engine both with short and long wheelbase.
- The position of the shock absorber fixing has been designed to satisfy both options.
- Fit exclusively the brand-new Malossi MHR Ø 52 Flanged Mount testa rossa cylinder, with flange mounting and a housing of such dimensions as to allow the installation of Malossi RHQ crankshaft with stroke 44 and connecting rod 90, without any further modification.
 - House exclusively the Malossi MHR and MHR TEAM inner rotor ignitions.
 - Use an electric cooling pump to eliminate the power consumption of the traditional mechanical water pump.
 - Eliminate the automatic mixer.
 - Designed to fit the vacuum fuel pump.
 - Install the new bigger reed valve, designed using sophisticated programs of 3D fluid-dynamics simulation.
 - Hold all current Malossi products.

This crankcase has been dreamed of and brought to reality with just one aim in mind: to produce the most innovative racing component for scooters that has ever existed.

Crankcase

for all scooters that fit a

Yamaha Minarelli LC 50 cc engine as original equipment

5716668

€ 498,00

Malossi has achieved the impossible, uniting the world of racing motors for scooters thanks to the RC-One Yamaha-Minarelli.

Our technicians have designed the RC-One Yamaha-Minarelli as a platform for bringing together the technical solutions as well as the internal external dimensions with all RCOne Malossi models.

The Malossi RC-One housings have been designed to be used only with 94cc Flanged Mount heating units with external studs. The generous pump housing dimensions are finally adequate enough for high capacity engine blocks. Malossi C-One uses the same transmission both for Piaggio and Yamaha/ Minarelli scooters, linking two worlds which have always been apart by enhancing and giving value to the best elements of both.

RC-One for Yamaha has been designed to be entirely Plug & Play for all scooters equipped with 50cc Yamaha/Minarelli liquid-cooled motors: no modifications to the chassis are required, and the internal section can accept all products in the Malossi selection for the RC-One range, becoming a revolutionary solution for the development of racing components for ALL scooters.

THE TECHNIQUE

The base of the cylinder has been inclined by 10° compared to the original drive shaft axle - gears.

This innovative development has allowed Malossi technicians to connect the motor attachments in front of the power unit, doing away with one of the biggest Achilles heels once of standard Yamaha/Minarelli motor housings once and for all. A modification underneath the saddle compartment. The base of the Yamaha RC-One has been designed to only house Malossi cylinders with flange mounts and external studs for the MHR Ø 52 Flanged Mount testa rossa family. The advantages of this solution open the door to the possibility of designing entirely unique cylinders.

The reed valve mount has been significantly changed thanks to the latest 3D fluid dynamics simulation software, allowing Malossi technicians to find the ideal ratios and dimensions. The automatic mixer and mechanical water pump have been removed to reduce dispersion as much as possible. The possibility to perform a native install of a Malossi internal ignition rotor has been allowed. As for the bike itself, RC-One for Yamaha is designed exclusively for scooters with rear disc brakes fitted as standard, and is not designed for the alternative use of brake shoes.

The interaxle spacing has been increased, with a consequential increased stability and precision when taking curves, whereas the gearbox housing has been reduced in size by overlapping the gear wheels. The increased interaxle spacing and the internal diameter means that the starter cover designed for Piaggio scooters is required. All RC-One for Yamaha housings are supplied complete with the components required for installation. Indeed, considering the notable technical differences when compared to standard units, Malossi has decided to include a reed valve, covers, and a special wheel pin in order to use the original rear wheel and make the RC-One perfectly interchangeable with Yamaha/Minarelli wheels and hubs. Another optional is the special rear mudguard to protect and keep the carburettor clean, now positioned at the rear.

Filter kit for AIR FORCE

2517260 – € 38,00

The range of Malossi engine crankcases now welcomes a new and precious addition: **Air Force**, the new engine crankcase **compatible with C-One, RC-One and the original Piaggio extended crankcase**.

It's called **Air Force** because its strength lies in the ability of simultaneously allowing entry of a **greater mass of air, channelling it precisely on the transmission components** and increasing the engine's capacity for hot-air extraction. The advantage that comes with this combined ability is a significant reduction in the temperature of the Over Range compartment and consequently, **improved stability and endurance of the transmission**.

Designed for die-casting, thanks to its structure, Air Force **considerably increases the mechanical resistance** of the whole assembly, providing an accurate and dynamic driving experience.

Lastly, its internal conformation frees up **all the space needed in the back area** for the clutch bell, significantly increasing the volume available for the transmission gear while also **greatly reducing the lateral dimensions** compared to the standard engine crankcase.

For Malossi C-ONE / R-C ONE CRANKCASE: 5715844 - 5716654 - 5715845 - 5716668

And original Crankcase Piaggio:

Testa Rossa Flanged Mount 70 cc

Maximum performance, flanged design, only for liquid-cooled scooters (7 ports and exhaust crossbar - piston with 1 segment - modular head - required use of C-One Malossi case - engine shaft with connecting rod different from the original).

Testa Rossa Flanged Mount 94 cc

The most powerful cylinder ever to be produced by Malossi. High capacity, flanged design, only for liquid-cooled scooters (7 ports and exhaust crossbar - piston with 1 segment - modular head - required use of RC-One Malossi case - engine shaft with connecting rod different from the original).

The most advanced production of Malossi cylinders is represented by Flanged Mount cylinders, **designed for Malossi C-One and RC-One engine cases and intended for liquid-cooled scooters only.**

Specifically designed to be used in high level competitions, they feature the latest evolution of the iconic Malossi 7 port technology, the strong point of which is definitely the support given to the main rear ports thanks to the use of the two lights opposite the exhaust, now added to the advantage of the reduction of the size of the stud bolts, now shorter and external. Making full use of all the additional space ensured by the flanged design, the lights have been redesigned wider and able to link up perfectly with the ones of the Malossi engine cases.

The shape of the exhaust also features a structure fitted with an exceptionally thin crossbar with an elliptical-shaped dual port, to minimize stress for the piston ring, combined with an **exhaust connection, part of the structure and following its shape.**

The inner profile of the head, once again modular, has evolved completely and thanks to its design it now guarantees more torque at all engine speeds. **The head cover is made of forged aluminium, red anodized and lathed in high precision CNC machines.**

The installation of a Testa Rossa Flanged Mount cylinder necessarily requires installation on a C-One or RC-One Malossi case and the use of an engine shaft with the length of the connecting rod that differs from the original. To make full use of the potential of these cylinders, it is necessary to draw fully from the Malossi catalogue, selecting all the racing components produced by the Bolognese company.

Gorilla Arm

Engine mount

1816426**€ 209,00****PIAGGIO ZIP SP 50 2T LC***Only for vehicles
with a Malossi engine casing
MHR C-one / RC-one***Patent pending**

To revolutionize the world of racing scooters, it is necessary to go further, invent new opportunities for customization, and find innovative and original solutions.

Malossi actually did start from these requirements to conceive **GORILLA ARM**, the new and futuristic engine mount.

Apart from the fundamental requirements of performance and safety, the new Malossi engine mount stands out for three unique features that make it exceptionally versatile.

MORE RESISTANT

The characteristics of modern racing scooters reached absolutely unthinkable heights when they were introduced and it was clear for some time that the original engine mount was no longer suitable. The new Malossi **GORILLA ARM** reformulates the component and introduces an **extremely sturdy box structure that is absolutely insensitive to any type of torsion**. Its shape goes perfectly well with the increased length of the long arm Piaggio or C-One Malossi casing, more stable because less subject to sudden forces that govern the movement of a short arm casing. **Thanks to its completely redesigned anchor point**, that connects to the original attachments of the engine casing, **GORILLA ARM** is absolutely impossible to break.

MORE VERSATILE

Malossi has conceived **GORILLA ARM** to offer pilots a high number of opportunities for the **customization of the chassis**, by acting on the axle spacing and the work angle of the engine casing, the bearing element of the chassis.

Thanks to a system of eccentrics obtained from a block of selected aluminium and locked into the main structure of **GORILLA ARM**, it is possible to change the chassis of the scooter completely:

- 3 axle spacing adjustments
- 6 simple presets for the rotation of the eccentrics
- 2 front anchor points that vary the other adjustments by 30%.

All this guarantees an impressive number of positions on which you can adjust **GORILLA ARM**, literally sewing up the chassis of the scooter around you.

New

Gorilla Arm

MORE FREEDOM

The standard engine mount has always limited the development of racing exhaust systems in two-stroke scooters. To overcome this drawback, Malossi decided to revolutionize the coupling system that connects **GORILLA ARM** to the engine casing, **completely eliminating the central pin and greatly increasing the available space in order to finally be able to design exhaust systems with an optimal aerodynamic development.**

GORILLA ARM is a product that Malossi imagined and studied for a long time, trying endless technical solutions before depositing **the patent**. And now the idea, the passion, the work and the technology that allowed us to create **GORILLA ARM**, make us extremely proud to present to our enthusiastic customers the absolute state of the art in terms of strength, performance and customization.

TECHNICAL FEATURES

- Box-shaped system with four 4mm steel arms joined together by two 2 mm steel plates that incorporate a tube of \varnothing 45 mm with a thickness of 2.5 mm.
- All of this, laser cut, is joined with stretches of TIG welding in precise points, the result of structural calculations.
- It has reached the resistance to bending with elastic return at 15,000 newtons for 2,000 cycles.
- Stripped and painted with transparent paint treated in the kiln, equipped with every detail, including the instructions for assembly, for which there are no problems of any kind, being perfectly interchangeable with the original.
- Aluminium caps with double axle spacing holes and 5 threaded holes for engine tilt reference.
- High resistance plastic buffers.

HONDA 125 2T LC

ALUMINIUM Ø 65 CYLINDER KITS

Malossi aluminium cylinder kit: the best balance between component performance and life of the component. The aluminium cylinder kit produced by Malossi s.p.A. is designed and manufactured with the specific objective of obtaining high combustion efficiency, long life, and a reliability that suits the Malossi name. Owing to the experience gained in the preparation of cylinder kits for race, Malossi engineers have developed the thermodynamics of aluminium cylinder kit to the fullest and designed the inner fluid mechanics of the cylinder kit with fanatical precision (see the transfer pipes, exhaust and combustion chamber), thereby obtaining a high level of turbulence in the combustion chamber. The latter has permitted a substantial reduction in specific consumption and a drastic reduction in the exhaust emission of pollutants.

**POWER CAM** camshaft

Aluminium COMPLETE CYLINDER Ø 63 pin Ø 14 H2O I-TECH 4-stroke

3114349 € 530,45

For vehicles produced <-2013

New 3116732 € 540,00

For vehicles produced 2014->

TECHNICAL FEATURES

Cilindro

Bore Ø 63 mm

Stroke 58,6 mm

Displacement 182,58 cc

Compression ratio 10,6:1

Material: primary aluminium alloy with a high content of hardened and tempered silicon, cylinder liner with silicon carbide coating in a galvanic nickel die and crossed smoothing with two diamond passages with very limited tolerances

Machining: on machine tools with high precision numerical control

Cylinder-piston connection with an allowance of 0.05 mm

Recalculated and upgraded heat exchange surfaces

Force Master 2 CDI with 4 different maps

Carburation adjusting

± 20% at min/medium/max

RPM limiter : + 1000 RPM

4 different maps

HARD

BIG BORE Testa Rossa 90 cc

The new generation BIG BORE engine. Stud bolts, only for liquid-cooled scooters (7 ports and exhaust crossbar - piston with 1 segment - modular head - required boring of original case or C-One Malossi case - engine shaft with connecting rod different from the original).

Deriving directly from seven port technology, which animates the revolutionary Flanged Mount, BIG BORE Testa Rossa cylinders represent the latest success achieved thanks to the efforts and studies that Malossi has continued to devote to engines intended for original Piaggio and Yamaha cases and, with their unprecedented **capacity of 94 cc**, they allow the BIG BORE family to make a significant leap forward.

Externally almost indistinguishable from their flanged counterparts, BIG BORE Testa Rossa cylinders feature a **stud bolt framework compatible both with original engines and with the C-One Malossi case**. Even inside they are totally similar to Flanged Mounts, thanks to the renowned configuration with seven ports and dual exhaust port, with the only difference given by the limits set by the inner passage of the bolts that affects the size and development of the exhaust.

The head is once again modular, with new internal profiles specifically designed to increase the torque and feeling of the engine, now much brighter and even more progressive. **The head cover is made of forged aluminium, red anodized and lathed in high precision CNC machines.**

The control unit has an adjustable RPM limit function to prevent engine damage.

Rotating the trimmer with a screwdriver will adjust the rpm limit between a range of 11,600 to 13,000, or exclude the limit function altogether. Every click corresponds to 100 RPMs.

The control unit is shipped in position F.

Arrow position	0	E	F
RPM	11.600	13.000	Limiters switched off

Considering the difficulty in identifying the engine manufacturer in certain vehicles, we suggest to carefully verify stroke, pin diameter and mounting stud pattern (see diagram) before purchasing Malossi products.

€ 310.00

When preparing motors, ignition usually gets secondary attention. Yet this component is of vital importance since it is the one that manages the exact moment in which to ignite the spark on the glow plug and regulates the amount of current that determines the quality of the spark in order to obtain optimal combustion. Both in prepared and original engines, replacement with a newer and more performing ignition is an operation that can breathe new life into the engine itself and allows for more efficient and simple fine tuning.

Malossi and its team of engineers are proud to announce **Power**, the 12 Volt electronic ignition for the entire family of Piaggio motor bikes.

This ignition, which is the top in its category, is distinguished by its easy assembly, typical of a plug & play product. In fact, the kit includes everything that could be needed for proper assembly and immediate use.

In the **Power** package, you will find everything you need:

- Adapter ring to correctly attach the stator to the casing!
- 12 Volt (90 watt) 4 pole stator. It IS necessary to change all of the original bulbs!
- Light flywheel (885 g for a 16.2 kg/cm² moment of inertia) hot moulded and designed to resist the highest amount of rotations!
- Red plastic fan!
- Ready to use wiring with output cable for battery charging or stereo connection, for original modifications!
- Voltage regulator!

With this kit, your Ciao will be hungry for laps and opponents on the track.
Power ignites your passion!

SCOOTER RACING MHR EXHAUST SYSTEM

3214589

For vehicles with stroke 125 cc

- EXHAUST in special sheet steel (0.8/0.10 mm thickness) manufactured using robotic T.I.G. and M.I.G. welding and manual torch welding with oxy-acetaline, artiginally peened. Clear coat finish.
- SILENCER in aluminum with satin finish.

MALOSSI POWER EXHAUST EXHAUST SYSTEM

3214431

For vehicles with original stroke

3214464

For vehicles with stroke 125 cc

- Exhaust system with noise reducing chicane flow design, complete with add-on refurbish able silencer.
- Expansion chamber with internal baffling, made of FeP04 steel with added noise reducing fibreglass packing.
- Painted with high temperature resistant transparent paint.
- Exhaust system includes a complete set of brackets, collars, screws and all parts needed for assembly, interchangeable with the original exhaust without need for modifications.

Table of applications

The models listed in the chart here below may have a different **THROTTLE BODY**, depending on the year of production/country where they are sold. Thus, they need a special cylinder equipped with cdi. When placing your order, please check the following identification numbers: country, frame number and engine number.
In case of countries which are not mentioned into below chart, you'll have to check the origin of the vehicle.

MODEL	COUNTRY	FRAME NUMBER	ENGINE NUMBER	Complete cylinders I-TECH 4 Stroke	
				Version with CDI integrated into the throttle body	Version without CDI integrated into the throttle body

homologated exhaust system

Top Performer

The Maxi Wild Lion now they're even homologated!
Perfection in their design, silent with increased performance,
unmatched in elegance and lightweight.
Maxi Wild Lion is an exclusive Malossi product- Made in Italy.

Technical features

- European homologation
- Elliptical cross-section casing made of stainless steel with laser marked logo
- Carbon end caps
- Silencer system with the addition of sound absorbing mineral fibers, possessing high noise damping and nondegrading qualities.
- Equipped with DB killer
- Stainless steel exhaust tubes from the cylinder or to the silencer.

(*) ATTENTION: THE "TYPE" ONLY SPECIFIES THE MODEL IN WHICH HOMOLOGATION WAS VALIDATED. THIS DOES NOT LIMIT THE INSTALLATION.

WITH NUMBER 9 Homologation that respects the limits for sound level requested by the European Directive 97/24 chapter 9 annex III

WITH NUMBER 9 - 5 Homologation that respects the limits for sound level and air pollution requested by the European Directive 97/24 chapter 9 annex III and chapter 5 annex VII

Homologated RX Black exhaust system

New

Malossi is pleased to announce the new homologated RX Black exhaust systems for maxi scooters!

It's a new line of homologated exhausts, suitable for a wide range of engines (up to 400 cc).

A genuine concentrate of technology, but with a very reduced weight: an RX Black exhaust weights approximately 3.5 kg only!

This weight reduction may even reach 3 kg depending on its application.

Internal components and DB killer were completely re-designed in order to achieve the best performance, while keeping noise levels within legal limits; vibrations are reduced with three silent-blocks, and assembly is extremely simple.

A further Malossi masterpiece!!!

Technical details:

- European homologation
- Aluminum alloy silencer with black anodized finish, manifold and bracket in stainless steel alloy.
- End cap made of carbon fibre
- Weight reduction to about 3.5 kg
- Easy assembly thanks to a shaped plate and three fasteners on the silencer
- Internal parts and DB killer entirely re-designed
- Reduced vibrations and shocks from the swing arm thanks to three silent-blocks

Catalytic converter

Catalytic converters enable to obtain the homologation against air pollution.

New 3216704B € 150,00
3216715B € 137,00

Technical details:

- European homologation
- Silencer, manifold and bracket in stainless steel alloy
- Carbon bottom plate
- Satin finish
- Weight reduction to about 3.5 kg
- Laser marked Malossi logo
- Easy assembly thanks to a shaped plate and three fasteners on the silencer
- Internal parts and DB killer entirely re-designed
- Reduced vibrations and shocks from the swing arm thanks to three silent-blocks

DB killer Racing

This racing DB killer allows to further improve the performance of the exhaust. Although it does not respect the European homologation standards, it keeps the noise within acceptable limits.

MALOSSI

HEAT MASTER

Dampens your engine's ebullient spirits

Suitable for ALL VEHICLES 50 cc LC

5516096

€ 282,00

It is significantly important to control the engine operating temperature. Not only you should know at how many degrees the engine is working, but it is important to vary its temperature depending on the different operating conditions.

Malossi understood this, thus creating **HEAT MASTER**, an electronic control system to be used with **ENERGY PUMP**, in order to adjust the engine's temperature in real time.

HEAT MASTER can be **installed on different scooter models, both two-stroke and four-stroke**. Its functions can be modified by easily working on the **trimmers** positioned on the cdi. By selecting the setting of **ENERGY PUMP** among different presets, you will set **the minimum and maximum temperatures as well as the warning lights** to be provided to the rider while riding.

Through its **HEAT MONITOR**, which can be easily installed close to the dashboard, you can **check the operating temperature** at which you want the engine to work.

HEAT MASTER turns on together with your engine and, thanks to its **sensors, it adjusts the functioning of ENERGY PUMP** in real time, thus varying RPMs so as to adapt the flow of coolant and consequently keep the engine's temperature within the parameters set by the rider.

Even in case the sensor is damaged, **HEAT MASTER** guarantees maximum reliability, thus detecting the breakdown and automatically setting **ENERGY PUMP** at its maximum power. The switch off is strictly manual, so as to **ensure engine cooling** even in case of malfunctioning.

ENERGY PUMP

Suitable for ALL VEHICLES 50 cc LC

5616363

€ 123,00

ENERGY PUMP is a water circulation pump for all liquid cooled, two and four stroke scooters and motorcycles equipped with a mechanical pump.

ENERGY PUMP can be installed as a replacement in all vehicles that use an electric pump, improving efficiency.

The new **MALOSSI ENERGY PUMP** eliminates friction loss and mechanical failures, operates silently, is easy to install, and comes complete with fuses and wiring.

A new impeller and a more powerful electric motor have allowed an increase in power of 33% compared to the previous version. The electronic management of the internal pump has been improved so as to maintain a constant power supply range between 10.5 V and 14 V.

This smart pump is equipped with an electronic card, once interfaced with a dedicated electronic control unit, can more precisely control the coolant temperature within the specified values.

These characteristics raise the **ENERGY PUMP** to a superior level. It's potential and versatility makes this a coolant pump ahead of its time.

In an internal combustion engine, good coolant circulation is a guarantee for improved efficiency, performance and durability.

SPECIFICATIONS

The pump is enclosed in a rugged PPC, a light and unbreakable polymer, resistant to high temperatures, acids and fuels.

It uses a 12V feeder supplied by the battery and has a robust electric motor with brushless excitation technology.

Traditional mechanical cooling pumps are normally driven by the crankshaft and follow the rpm of the engine.

For this reason, they are not always able to supply the correct flow for proper cooling, e.g. low engine speeds and high loads.

ENERGY PUMP is equipped with an electronic card (electronic switching WCP) which, combined with a dedicated controller, allows you to adjust the flow rate to the cooling requirements of the engine, regardless of the conditions of the engine speed and of the applied loads.

This means that the engine always operates with optimal coolant temperatures.

	Units	
Voltage Range	V	9 ÷ 15
Nominal Voltage	V	12
Pumping Capacity @ 100 mbar	L/h	1200
Current Consumption (12V, 100 mbar, 23°C)	A	1,6
Operating Temperature	°C	-40 ÷ 135
Nominal RPM (12V, 100 mbar, 23° C)	Rpm	3200
Protection Class		IP55

WILD LION

**Homologated exhaust systems
for Scooters 50 2T**

New

***Gritty looking,
silent,
performing.***

Designed to complete an optimal engine thermodynamic cycle, defined at the test bench and tested on rough road paths with strong slopes.

Made of mild steel sheet, internally covered with soundproofing materials, featuring a reinforced “chicane”, epoxy-coating and aluminium die-cast heat shield.

MALOSSI HYPER RACING

Scooter Racing Exhaust System

The perfect musical instrument to make your Malossi motor sing

Scooter Racing Malossi exhausts are designed and built with one objective: maximum possible performance **tuned to the cylinders for which they were designed**. Every evolution of Malossi exhaust systems is the result of fluid dynamic research which establishes the ideal shape and size of Scooter Racing exhausts with precision.

Only perfect exhausts with a completely uniform production process can proudly display the Malossi brand. Indeed, the production technology is applied to all Scooter Racing models, the only differences between them being **the divergence of the cones**.

All Scooter Racing exhausts are made from **sheet metal of a precise and constant thickness of 0.8 mm**, are laser cut and welded with pinpoint precision, and have a calibrating nozzle whose size respects the minute tolerances needed to maintain pressure inside the silencer at the correct levels.

The development of Scooter Racing exhausts advances at the same rate as Malossi cylinders and **in order to get the best performance, it is important to match the exhaust to the cylinder for which it was designed**.

All Scooter Racing are fitted with **aluminium silencers, anodized in Nitro Blue**.

MHR TEAM 3 and MHR BIG BORE Ø 52

MHR Team 3 and MHR Big Bore Ø 52 are the NEW Scooter Racing exhaust names designed for Testa Rossa Flanged Mount cylinders, 70 and 94 cc respectively, and are characterised by an unprecedented cone profile, now rotated vertically, for an even more dynamic appearance.

Malossi engineers have managed to considerably increase power and have paid particular attention to rounding of its usage range, in order to increase the field of action and fine tune the assembly more quickly. There is a high rev range for the motor and **the best power levels are achieved at 14,100 rpm for the 70cc, and 13,800 rpm for the 94cc**.

The assembly system on the cylinder **uses an attachment with four light alloy holes**, designed to allow a perfect flow of exhaust gases, and so optimising fluid dynamic flow. This solution is a direct development of the technology used by the MHR Team 2 exhaust, where as it is unprecedented on the Big Bore Ø 52 version.

The connection system for the **Nitro blue** anodized aluminium silencer has been simplified, and is now linked to the expansion chamber in a light and elegant way, using only one holding screw.

MHR REPLICA HOMOLOGATED EXHAUST SYSTEM

The engineers at Malossi R&D Department have improved the vehicles performance according to laws and regulations after strict testing with sophisticated and modern equipment.

The GP MHR REPLICA exhaust systems address a sporting and demanding customer; they personalize your vehicle with elegance and with a "performance sound", completing the thermodynamic cycle of the famous Malossi MHR REPLICA cylinder kit.

TECHNICAL FEATURES

EXHAUST in special sheet steel (1 mm thickness) manufactured using robotic T.I.G. and M.I.G. welding of cone sections. The exhaust feature silencing baffles, aluminium alloy mounting brackets with vibration isolaters. Clear-coat finish.

SILENCER in aluminum, anodized in Nitro blue.

GP MHR for MOTO

The Racing Exhaust developed on the racetrack for the racetrack.

It is one of the essential components intended for **MALOSSI trophy**, studied especially to increase the power of the engine at medium and high regimes. The Malossi Trophies are raced in all the world according to precise rules that require different Special Malossi Racing products for each category. This insures an optimum and homogeneous result for the various participants while utilizing the most advanced technologies.

With the **GP MHR** exhaust systems Malossi expands its range of trophy exhaust systems, that represents the highest performances in the sector.

Another Malossi' initiative which provides an opportunity for the young to participate in a two-wheeled sport and become the riders of the future.

TECHNICAL FEATURES

- **EXHAUST** in special sheet steel (0.8/0.10 mm thickness) manufactured using robotic T.I.G. and M.I.G. welding and manual torch welding with oxy-acetalline, artiginally peened. Clear coat finish.
- **SILENCER** in aluminum, anodized in Nitro blue.

Homologated EXHAUST SYSTEM

Beautiful! Technologically perfect: with their strong character and such an aggressive shape, they give a touch of "High-Class" to the maxi scooter enhancing it in a superlative way.

Thanks to the great development of Malossi technical staff (utilizing the most up-to-dated labs) and to the extensive racing experience, Malossi wanted to make a significant difference by incorporating the following design requirements to the new **GP MHR REPLICA 4-Stroke** exhaust system: innovative look, performance, lightness, reliability and QUALITY.

Technical features

- European homologation
- Elliptical cross-section casing made of aluminium with black anodized finish and laser marked logo
- Carbon end caps
- Silencer system with the addition of sound absorbing mineral fibers, possessing high noise damping and nondegrading qualities.
- Equipped with DB killer
- Stainless steel exhaust tubes from the cylinder or to the silencer.

The final assembly utilizes stainless steel riveted clamps producing a sealing area of exceptional mechanical strength in turn eliminating any exhaust gas leakage.

The **GP MHR REPLICA 4-Stroke** Exhaust Systems come complete with all the necessary mounting hardware and gaskets.

51 7075 – HOMOLOGATED

2011

Dekra Certification GmbH certifies that Malossi produces its complete variators and CVT-kits efficiently applying a quality management system, as required by the German and International road circulation law (KBA).

2014

Multivar 51 7075 is covered by homologation (Teilegutachten) according to §19 (3) of StVZO (German rulebook for vehicles on the road).

In order to be put on the market, tuning parts in Germany must be first homologated according to the rulebook for vehicles on the road StVZO. Our Multivar variator has successfully overcome the severe tests required by the German regulation in order to obtain the homologation (Teilegutachten).

Tests have been performed directly at Dekra labs in Germany, where the excellent structural and functional features of the Malossi product have been confirmed once again.

Available on website - multivar.malossi.com - the specific assembly instruction

New

SPECIAL X BELT

Technical features:
 1 POLYAMIDE FABRIC
 2 CHLOROPRENE RUBBER-COATED FABRIC
 3 CHLOROPRENE BEARING
 4 **POLYESTERE ELEMENT**
 5 COMPOUND OF CHLOROPRENE ELEMENT LOADED WITH FIBERS

Tourist – Sport use

X Special Belt

X Special trapezoidal belts are the best choice to ensure maximum performance and reliability from your scooter.

They are produced with special mixtures to guarantee optimal resistance and drive; their forms have been developed to perfectly fit the surface of the automatic transmission elements.

X Special Belt is not only perfectly compatible with the original belt, but it offers all the advantages of a Malossi high-quality product.

KX BELT

Technical features:
 1 POLYAMIDE FABRIC
 2 CHLOROPRENE RUBBER-COATED FABRIC
 3 CHLOROPRENE BEARING
 4 **KEVLAR® ELEMENT**
 5 COMPOUND OF CHLOROPRENE ELEMENT LOADED WITH FIBERS

Sport – Racing use

X K Belt

Malossi X K Belt is the top of racing transmission belts!

Made with hard-wearing materials combined with Kevlar® inserts, Malossi trapezoidal X K belts provide a very high thermal and abrasion resistance. Worthy exponents of MALOSSSI HYPER RACING product range, they are the result of decades of experience and of search for absolute performance in the racing field.

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

Products to be used exclusively for racing in places specially designed for such activity according to the regulations of the competent sporting authorities. We accept no liability resulting from improper use.

Malossi recommends to perform belt maintenance following the instructions given by the vehicle manufacturers.

HIGH RESISTANCE ROLLERS for original variators and Multivar

HTRolls are made of a special compound CPT. The relative weight of each roller is clearly marked on one side. HTRolls are High Tech replacement parts for the original rollers; a complete calibrated set capable of varying your scooter's transmission ratio by perfectly regulating velocity and acceleration.

Function. Due to the rotation of the variator, the roller's weight creates a centrifugal force; the greater the roller weight, the greater the centrifugal force, therefore resulting with a faster gear change and viceversa.

Variator Calibration. To optimise your engine's performance, use rollers that maintain your engine's RPMs at your engine's peak power RPMs. Reducing the roller weights will increase the engine's RPMs and increasing the roller weights will reduce the engine's RPMs.

66 9417.AO gr. 03,2
ATTENTION: When ordering please remember to attach the code letter/number that represents the desired weight to the part number. See example above in RED.

New

Centrifugal clutch system with clutch bell.

Two products that Malossi produces and sells separately, with great success.

Malossi now offers these two quality products paired, guaranteeing the optimal scooter transmission performance.

Due to the strong demand for these two products, we decided to offer them both in a single package.

This allows Malossi to supply two quality products with a cost savings for the customer.

Further improving a product is Malossi's passion, constantly searching for any aspect to improve hence optimizing operation and increasing reliability and safety. This directly benefits the customer.

Maxi Fly Clutch

Fly Clutch is a reinforced centrifugal clutch designed to easily withstand extreme operation, for example, constant stop and go on steep roads, city traffic, long series of traffic lights, especially with a passenger, and during hot weather when it becomes difficult to control scooter temperature levels.

Fly profits greatly from Malossi's experience, results acquired from research and thousands of tests performed in the field of scooter racing.

Maxi Delta Clutch

Delta Clutch is a clutch developed within the scooter racing circuits and in a short period has become a benchmark product, key to scooter performance.

The simplicity of the system quickly allows spring adjustment with regards to centrifugal force and the possibility of interchanging a spring with different K values. These values are listed in the Malossi catalogue.

Another option this system allows is position adjustment of the small mass which determines the pressure between friction material and clutch bell. In addition, this small mass is interchangeable with other masses of varying weights.

The complete system is patented to protect against shameless attempts to copy and falsify the product.

Delta has attained the recognition of many qualified tuners and the facts are the proof: used by all the racing teams and a vast amount of sport riders, resulting in a continuous increase in sales.

As always, Malossi constantly analyses its products during their operation and Delta is no exemption. It has been optimized by implementing small but important updates, maintaining Delta as a leading edge product.

We are very proud of the fact that Malossi clutches are asbestos free, however, much investment in research was needed in achieving this present level of quality, reliability, and especially selection of friction materials.

We can now affirm, with great certainty, that we possess an exclusive formula for producing a high temperature resistant material that does not alter its coefficient of friction due to prolonged operational stresses.

Maxi Clutch Bell

Technical Specifications

- Clutch Bell forged using Fe P04 deep-drawing steel;
- Carbon steel centre hub made of round stock and TIG welded;
- Anti-vibration band welded using a 3 point 120° pattern;
- 100% dynamically balanced;
- Surface hardened through nitriding.

Wing Clutch Bell

Technical Specifications

- Clutch Bell forged using Fe P04 deep-drawing steel;
- Carbon steel centre hub made of round stock and TIG welded;
- Surface hardened through nitriding;
- Finned reinforcement ring, made of machined carbon steel, black oxide surface finish, press fit;
- 100% dynamically balanced.

2 RADIAL BALL BEARINGS for crankshaft

Rigid radial ball bearings with oversized spherical rollers and increased operating load, developed for racing endothermic engines with higher power than 30 Kw and speed up to 18.000/20.000 RPM. In co-operation with Malossi Engineering R&D department, SKF optimized a new kind of special bearings for two and four stroke scooters and motorcycles competing in the Malossi Trophy series. Technicians and field specialists welcomed with enthusiasm this further technical progress, which guarantees higher reliability and performance increase.

Technical Specifications

- Material: high quality 100Cr6 steel alloy
- Polyamide spherical roller cages: light, noiseless, with lowest damping factor
- High precision: C3 H – C4 H tolerances
- Art. 6614105EA – Ø 20x52x12 special roller bearing for tuned scooters based on Piaggio 50 cc., with carbonitrided inner ring, polyamide cage and special outer ring, further modified by Malossi in order to improve lubrication.

(X) = Carbonitrided inner ring.

(W) = Carbonitrided inner ring and oversize balls.

(K) = Carbonitrided inner ring, oversize balls and special reduced outer ring.

(J) = Carbonitrided inner ring and special reduced outer ring.

S = Single.

C = Pair.

(Z) = Metal shield on one side of the bearing.

(2Z) = Metal shield on both sides of the bearing.

(2RS1) = Rubber seal (nbr) with a sheet steel reinforcement on both sides of the bearing.

(2RSH) = Rubber seal (nbr) with a sheet steel reinforcement on both sides of the bearing (like 2RS1 but it has a different way of fitting the seal into the bearing)

New**MALOSSI**

Special high-precision bearings

High-speed bearings with increased load capacity, designed and tested for endothermic racing engines.

Special high-speed precision bearings, reinforced for increased load and heavy applications, with oversize balls, carbonitrided inner rings, steel and polyamide cages. The co-operation of Malossi technicians with the company SKF allowed to obtain an important technical result for the fine-tuning of high-quality racing engines.

Above all, we would like to point out bearing art. **6614105EA**, since it features - besides the carbonitrided ring - reinforced load capacity, polyamide cage and reduced outer ring tolerance. This last modification was made by Malossi technicians to achieve a better lubrication of the ball guides. In order to check the suggested application, please see the below chart, based on the results of severe tests performed by Malossi technicians both tracks. The column of technical specifications bears an abbreviation which indicates the main technical features of each bearing.

MALOSSI

OIL-SEAL

FKM plus PTFE

Responding to the requests of our exacting customers, Malossi proudly offers a new product line of engine oil seals for scooters, filling a void in the market.

Oil seals with special characteristics, high quality for racing, with low rotational friction and high durability. FKM plus PTFE oil seals boast the highest quality materials and advanced material technology ensuring product quality which is, as always, the driving force and pride behind Malossi.

In presenting this new product to our esteemed enthusiasts, Malossi, in the hope of achieving its desired goal, would like to thank its customer's loyalty to the brand.

Technical Characteristics

- 1)** Oil seal's body primarily constructed of a special mix of synthetic rubber and fluoropolymer elastomers (FKM).
- 2)** Support structure consists of a carbon steel armature, encapsulated with FKM.
- 3)** Internal seal design consists of an auxiliary dust lip and primary sealing lip made of PTFE, a material with a low coefficient of friction and high wear resistance.
- 4)** Stainless steel internal spring, designed to maintain constant pressure on the rotating shaft.

MALOSSİ

SECONDARY GEARS HTQ

Transmission gears made of special steel with straight teeth and recalculated ratio. They completely eliminate all the axial pressures, thereby reducing stress on the bearings. They are constructed using high-precision machine, casehardened, tempered and ground to provide silent running and long life.

SECOND ROLLER GEAR for Piaggio and Gilera engines

Straight-shaved-toothed gears. Defeating friction to reduce energy consumption! With the new SECOND ROLLER GEARS, Malossi engineers aimed at reducing to a minimum the losses due to friction in the gearbox allowing the engine to transmit the most horsepower available to the rear wheel. The innovative aspect of this design lies in the addition of two roller bearings in the gearbox located at the end of the crankcase, supporting a special straight-toothed secondary shaft. This installation converts the sliding friction system due to the rotation of the shaft causing direct steel-aluminium contact (see original system) into a rolling friction system revolving around steel rollers. The advantage of this system also lies in its ease of installation: simply insert the two roller bearings, included in the Malossi SECOND ROLLER GEAR package, into their original housing.

Table of applications Piaggio and Gilera

ATTENTION : We would like to inform you that, since early 1998, Piaggio has modified the keying of the secondary drive gears in its scooters. As even Piaggio itself is not able to give any accurate and exact information on when the new gears will start to be fitted as standard on the various types of scooters, and on the engine reference numbers, currently the only possibility is to check visually the gears after disassembly. To make the task of replacing the ratio on these scooters easier, we have filled two tables: the one below organized by vehicle and the one in the following page organized by 1st SERIES, when existing, and the 2nd SERIES.

		Teeth	SECONDARY GEARS			SECOND ROLLER GEAR

New**RED
FILTER****E18 Malossi air filter**

With the introduction of the sport air filters **E18**, Malossi has widened its range of products with a new range of **highly performing and resistant** air filter.

The E18 filters are champions as for versatility: as a matter of fact, although they are specifically designed for four-stroke engines, they are incredibly efficient even if applied to two-stroke engines. They are available in two different sizes (95 and 125), they may be adapted to any type of vehicle, owing to the **oval tapered structure**, able to facilitate their correct positioning and to the various types of connections available, **snap-fit or threaded**.

Implemented with **cotton weaves, featuring long greased multilayer fibres**, these filters have a perfect structure to keep any impurity out of the engine. Externally and internally, the fibres are protected by an aluminium mesh, which acts as a **flame break**, assuring maximum safety and, at the same time, the perfect direct air flow.

E19 Malossi air filter for Yamaha T-Max

0417225
€ 98,89

YAMAHA T MAX 530 ie 4T LC 2012->2014 (J409E)
T MAX 530 ie 4T LC 2015-> (J409E)

**ONLY for vehicles WITH Malossi
THROTTLE BODY 1616722**

Original, **extremely performing and simple to install**, the new E19 Malossi air filter, dedicated to the Yamaha T-Max, changes the rules of the game and further widens the already rich range of products, designed for the suction of the Japanese V-twin model.

E 19 is implemented externally in open-cell polyurethane and internally, it is reinforced with a metal mesh armour. The filtering element is **15 mm thick**, it is self-extinguishing and offers a great accumulation capacity, owing to the density of **60 holes per inch**, whereas its internal mesh accurately keeps the shape and the size of the same filter.

The suction horns are incorporated by means of a **satin-finished aluminium support**, fastened on the sleeves of the same horns. This particular structure allows a **suction spacing of 180°**, assuring the engine a remarkable fresh air supply. The support is provided with the connections for the temperature sensor, for the vents of the oil vapours and for the air duct of the idling speed mode.

The installation and the maintenance of E19 are a real breath of "fresh air": the whole structure of this filter, as a matter of fact, is fastened with **only two screws and it can be disassembled even when the fairing is assembled**. The filtering element becomes bright red, and the Malossi logo stands out in yellow colour and it leans on a compact polyurethane base structure, red as well, as if it were the beating heart of your T-Max.

483

This range of shock absorbers was born thanks to our firm's desire to offer their customers a range of products of superior class, capable of granting great riding comfort coupled with matchless driving safety.

The technical characteristics of these special shock absorbers demonstrate they are the most technically advanced on the market today:

- **RS 3** Oil-gas shock absorber with adjustable spring preload.
- **RS 24** Oil-gas shock absorber with adjustable spring preload and rebound damping.
- **RS 24/10** Oil-gas shock absorber with adjustable spring preload, compression and rebound damping, with an external compensating reservoir with hose connection that allows an increase of internal fluids.
- **RS 24/10-R** Oil-gas shock absorber with variable setting and extension/compression adjusting, compensated for a pressurized nitrogen chamber.

Malossi is pleased to announce two new gear-box covers for scooters and Piaggio 50 cc engines, designed for racing and for a sport upgrade of standard production scooters.

Malossi, after revisiting the gear box assembly, has reduced friction drastically by replacing the original cover with two new gravity cast covers, assembled with special bearings.

These new covers, machined with high precision machines, have increased strength and reduced weight and able to withstand very high workloads, typical in racing.

Perfectly interchangeable with the original covers and complete with all necessary bearings and seal, the Roller Crankcase helps reduce friction by 4% for the MHR version P/N 2514521 and 6% for the MHR TEAM version P/N 2514603. These covers require using Malossi Secondary Roller Gears:

- **P/N 2514521 : MHR** Version to be used with Malossi Secondary Gear or original.
- **P/N 2514603 : MHR TEAM** Version to be used with Malossi Second Roller Gear.

2514521 MHR € 95,00

2514603 MHR TEAM € 95,00

for Piaggio engines

Technical Characteristics and Components

- One (1) reinforced gear-box cover, gravity-fed permanent mould casted with aluminium-silicon alloy, heat treated.
- Increased secondary shaft bores for two bearings - Two (2) special needle roller bearings - One (1) ball bearing with increased load capacity - One (1) oil seal.

Roller Crankcase for Minarelli-Yamaha engines!

New look for our MHR Roller Crankcase, made for Minarelli-Yamaha!

This restyling results in the following innovations:

- Military Green Anodized protective coating
- Milled Malossi MHR Logo
- Machined MHR Lion
- Installed bearing and oil seal for primary shaft

Technical description

Gear-box cover for scooters and Minarelli Yamaha 50 cc engines, designed for racing and for a sport upgrade of standard production scooters. Malossi, after revisiting the gear box assembly, has reduced friction drastically by replacing the original cover with the gravity cast cover, assembled with special bearings. This cover, machined with high precision machines, has increased strength and reduced weight and able to withstand very high workloads, typical in racing. Perfectly interchangeable with the original cover and complete with all necessary bearings and seal, the Roller Crankcase helps reduce friction by 4%.

Technical Characteristics and Components

- Reinforced gear-box cover, gravity-fed permanent mould casted with aluminium-silicon alloy, heat treated.
- Increased secondary shaft bores for two bearings - Two (2) special needle roller bearings - One (1) ball bearing with increased load capacity - One (1) oil seal.

Note: version to be used with Malossi Secondary Gear or original.

Pinwheel Shaft

MALOSSİ

New rear wheel axle, completing the set of primary and secondary gears!

This rear wheel axle is a result of Malossi's twenty years of experience in gear designing and production for road and racing scooters.

The rear wheel axle was designed and manufactured to be assembled into the original gear box without any modifications.

The Malossi engineers have worked to reduce the rotating masses, hollow the wheel axle and increase rigidity and strength of the axle.

Ideal match: MHR gear box cover, exaggerated performance!

Technical Specifications

- Material: special tri-alloy steel made to our specifications, hardened and tempered.
- Manufactured with high-precision CNC machines.
- Individually inspected to ensure the correct functional clearance.
- Entirely ground finished.

New

Malossi is pleased to offer their customers its new final transmission gear assembly...

THIRD SUPPORT

6714733 € 125,16

**MBK NITRO 50 2T LC
YAMAHA AEROX 50 2T LC euro 0-1-2**

Malossi, always attentive to rider's observations and requests, has focused on Minarelli-Yamaha, considering the CVT system has shown some deficiencies.

At high RPMs, the driven pulley generates strong vibrations and oscillations to the primary gear shaft. To remedy this problem, an additional bearing, inserted into the original crankcase cover is used creating a third support for a redesigned longer gear shaft. This modification prevents the gear shaft from flexing thus allowing the CVT system to operate correctly.

Two simple modifications are required to install this support bearing in the original crankcase cover (See assembly instructions).

Technical Characteristics

- H.t.q. gears z 14/42 designed with straight teeth reducing to a minimum, losses due to friction, and stresses in the supports.
- Optimized gear ratios.
- Extended primary gear shaft.
- Polished steel alloy bearing support.
- Sealed bearing.

Note: to be assembled only with original crankcase cover.

Power Transmission MHR

Malossi Super T Max quickens its steps.

Mhr Power Transmission, art. 6714757, is a Malossi project:

HTQ Z 26/40 pinion and ring gear pair with lengthened gear ratio,

Malossi Morse lightened, narrower, frictionless racing chain.

This system completely replaces the original primary gears (25-tooth pinion and 41-tooth ring gear) with a 26-tooth drive pinion and a 40-tooth driven ring gear, thus providing a 7% longer ratio.

Besides providing this longer ratio, these gears are narrower, as to fit the new Malossi Morse racing chain, which is frictionless and without friction springs, thus lighter, more sliding and with higher resistance and long life compared to the original one, since "you can't break what is missing".

Malossi is glad and proud to offer its customers a further masterpiece of modern technology.

6714757 € 265,00

Technical details

HTQ Z 26/40 pinion and ring gear pair

- 1) Toothed ring gear pair with narrower walls, consisting of one 26-tooth drive pinion and one 40-tooth driven ring gear, made in Cr Ni Mo 5 alloy steel, tempered and case-hardened, manufactured basing on Malossi design with high precision machine tools.
- 2) Tooth profile designed for maximum resistance and minimum noise.
- 3) Tooth contact surfaces provided with maximum finish to ensure very long life and operating reliability.
- 4) High-standard inspections on each component, from raw materials to the finished product, ready for sale.

Malossi Morse Racing chain

Narrower chain, designed to eliminate the lateral friction of the original chain.

NB: we recommend not to modify Malossi Morse racing chain, art. 6114474B, in order to fit the original or other manufacturers' pinion and ring gear pair. Malossi does not assume any responsibility, thus won't recognize any warranty in case of damage.

Power Transmission SPORT

z 26/40 for ORIGINAL CHAIN

6714418 € 148,00

With Malossi it's now possible to lengthen the gear keeping the original chain! Very new gear sets which lengthen the pitch of about 7%; they must not be confused with Power Transmission MHR system art. 6714757. This Sport version must be used only with the original chain since Malossi racing chain is narrower and it doesn't accept original or similar ring gears.

New

The lifeblood of your engine

For the correct operation of an engine and of all its parts, nothing is more important than the perfect lubrication. This is the reason why Malossi, producer of special ultra-high performance components, has over time, introduced a line of lubricants specially developed to enhance the technical characteristics of its products.

Searching for lubricants available on the market perfect to enhance the technical characteristics of its engines and of its automatic transmissions, Malossi had quickly recognised the need to formulate a complete line of lubricants specifically for its products, above all for two-stroke engines where the engine oil plays an active role even in the combustion phase.

So 7.1. came into being, a Malossi Group brand, a full range of lubricants developed to complement and keep pace with the technical evolution of the two and four stroke and engines.

The 7.1 lubricant formulas are unique and the trademark is a true icon in the competition world. All of the range was developed to guarantee durability and performance for racing engines or those of street bikes and scooters, under all types of conditions.

Continually evolving, 7.1. is the boost to your performance, the defence shield for your mechanics, it is simply the lifeblood of your engine.

76 LUBRICANTS

RACING FILTER OIL FULL SYNT

7617078 [12] Bottles of 0,25 L

€ 62,01

AIR FILTER TREATMENT SYNTHETIC LUBRICANT

Surface treatment of high technology, developed to increase the efficiency of the air filters. Biodegradable over 90%.

It contains additives with high polarity that confer superior adhesiveness, preventing the passage of sand, dust and water without altering the air passage. Developed to provide protection to the engine even under the most severe operating conditions. It reduces the risk of breakage and contributes to longer engine life.

Free of chlorinated solvents, does not damage the material from which the filter.

APPLICATION:

Use a regular degreaser / cleaner removable with water, for normal cleaning of the filter. Rinse with water and dry.

Soak in the synthetic lubricant for air filters treatment, remove any excess and let dry, allowing the formation of a lubricating film before reinstalling the filter and start the engine.

 MOTOROIL®

Engine oil for **SCOOTER 4T**

4T OIL SPORT ENGINE

Specifications : **API SG, SH, SJ - JASO MB**

[6] Bottles of 1 L

New synthetic lubricant, specific for the use in modern scooter and motorcycle 4 stroke engines with high performance. It offers an excellent thermal stability and stay-in-grade within a vast range of temperatures, with higher anti-rust and anti-wear features. Compatible with catalytic exhaust systems prolonging the life of the catalytic exhaust, higher gas mileage, and a reduction in emissions. A Multi-Grade oil that allows optimum engine performance and easier starts in every season.

4T OIL RACING FULL SYNT

Specifications : **API SG, SH, SJ - JASO MB**

[6] Bottles of 1 L

Full Synthetic Ester 4-Stroke Engine Oil for competition Scooters and Motorcycles. The product offers excellent stay-in-grade performance over a wide temperature range with outstanding anticorrosion and anti-wear characteristics.

- Superior stay-in-grade performance ensures full protection throughout the service life of the oil.
- Catalytic converter compatible, prolongs catalyst life thus maintaining environmentally acceptable emission tolerances.
- Low volatility reduces emissions, extends exhaust system life and ensures low oil consumption.
- Viscosity characteristics ensure fuel efficient operation and easy starting in both summer & winter conditions.
- Excellent anti-wear and anti-corrosion properties reduce friction thus promoting performance retention and long engine life.

76 LUBRICANTS

4T OIL SPORT ENGINE (SAE 10W-40)

7615797 [6] Bottles of 1 L € 63,32

Specifications : API SG, SH, SJ - JASO MA2

Synthetic oil based lubricant for 4-stroke ENGINES of street bikes. The grade required and recommended by all the manufacturers of street bikes. This formulation, based on synthetic oils, ensures maximum reliability in any environmental condition. Ensures an excellent level of protection against wear of lubricated components and superior engine cleanliness with extended life. Suitable for gearboxes and transmissions where the manufacturer suggests the use of SAE 10W-40 engine oil. Reduces fuel consumption and emissions, and provides maximum corrosion protection even in periods of intermittent use. Compatible with catalytic converters. This product can be used in wet clutch systems.

4T OIL RACING FULL SYNT (SAE 5W-40)

7615800 [6] Bottles of 1 L € 76,74

Specifications : API SG, SH, SJ - JASO MA, MA2

100% synthetic ester lubricant for high-performance 4-stroke ENGINES, mainly for motorcycle racing. The reduced internal friction, thanks to its low viscosity, allows the engine to unleash more power. The service life and protection of the lubricated components are ensured by the high stability of the lubricant film at all operating temperatures. The high cleaning power ensures superior engine cleaning, and maintains performance. Compatible with catalytic converters. Low volatility and reduced fuel consumption and emissions. This product can be used in wet clutch systems.

New

Engine oil for **SCOOTER 2T**

**76 8231S**

2T OIL SPORT ENGINE (SAE 20W-30)

Specifications : **API TC - JASO FC****[6] Bottles of 1 L****€ 72,05**

It is a special semi-synthetic lubricating oil of high quality tested for both liquid and air cooled racing engines, with or without mixer. It is suitable for any 2-strokes engines and it offers very high performances. 7.1 is a lubricating oil composed of ash-free additives and it is able to guarantee the maximum cleanness of the involved components, absence of deposits, substantial reduction of smokes.

**7616711****New**

2T OIL TOP RACING FULL SYNT (SAE 40)

Specifications : **API TC - JASO FC - JSO L-EGD****[6] Bottles of 1 L****€ 156,46**

Developed exclusively for racing 2-stroke engines, 7.1 TOP RACING is formulated using synthetic esters that ensure exceptional anti-wear properties, reducing internal friction and guaranteeing consistent performance over time. 7.1 TOP RACING ensures superior load-resistance and cleanliness characteristics for racing engines, requirements necessary for the full development of power even with very rich oil-gasoline (oil-petrol) blends. 7.1 TOP RACING is particularly resistant to sticking piston rings and the formation of residues on spark plugs, to help the engine to develop maximum power for the whole duration of the race. The product forms a tough film between the cylinder, piston and piston ring, prolonging the life of the engine. It can be mixed with any type of gasoline (petrol), in every season of the year, without any problem of mixing and stability of the mixture.

**76 8230S**

2T OIL RACING FULL SYNT (SAE 20W-30)

Specifications : **API TC - JASO FC****[6] Bottles of 1 L****€ 104,84**

Thanks to the experience Malossi gained in races, an innovative product for 2-stroke engines with high performance was born. 7.1 is a completely synthetic lubricating oil obtained with a high quality synthetic base and carefully selected additives to guarantee the highest performance without neglecting the protection of the environment. It has been designed for racing vehicles with or without separate mixer.

7.1 guarantees:

- High engine efficiency
- Reduction of the wear of the involved components and thereby a longer life of the vehicle.
- Minimum formation of incrustations and deposits in the combustion chamber and at the exhaust.
- It avoids piston rings to be stuck together and therefore it guarantees the perfect tightness of the compression for long.
- Substantial reductions of exhaust smokes.

VESPA GEAR OIL (SAE 80W-90)

[12] Bottles of 0,25 L

€ 51,08

VESPA GEAR OIL

Advanced formula oil expressly formulated *for all Vespa gear* cases and transmissions, from the most recent to the very first models!

It contains E.P. additives which protect transmission parts even under severe shock load conditions and give outstanding long life wear resistance.

By reducing viscous drag and friction, the product ensures smooth and slick gear changes, reducing wear and transmission power losses.

The unique thermally stable construction of these lubricants maintains higher protection in all climates.

This product has been tested on all models of Vespa wet clutches.

It grants higher performances and it prevents the overheating of the gear parts in such a better way compared to the traditional mineral oils.

RACING GEAR OIL FULL SYNT (SAE 75W-90)

[12] Bottles of 0,25 L

€ 56,07

GEAR OIL

Synthetic gear lubricant for racing scooters and bikes. It has high natural viscosity index and excellent shear strength, as well as higher load resistance. The synthetic materials used for this formulation have an oxidation stability up to 3 times higher than that of traditional mineral oils, prolonging the effective life of the lubricant, even if subjected to extreme working conditions. Beside this, the lower friction value leads to reduced pitting and wear of the gear teeth. Its excellent E.P. features and its low viscosity help in protecting the gearbox components.

7613469

SPORT GEAR OIL (SAE 80W-90)

New

MRG grease

7611882S

[6] Tubes of 40 gr € 31,77

High resistance grease with a mineral base and a special formulation with molybdenum sulphide additive. MRG has been studied for scooter variators and torque drivers. It provides extended life of rollers and of all mechanical parts.

- for all the ORIGINAL and MALOSSI TORQUE DRIVER (mobile driven split pulley)
- for VARIATORS that require lubricating grease, as indicated in the Fitting Instructions

NOTE. must only be used with variators that require grease.

MHR grease

Semi-synthetic high performance grease with a lithium complex soap thickener.

7615375S [6] Tubes of 40 gr € 46,80

The new MALOSSI 7.1 MHR GREASE, recommended for use in extreme conditions or with operating temperatures up to 160° C.

Description

MALOSSI 7.1 MHR GREASE is recommended for the lubrication of scooter variators and rear pulley assemblies, operating under severe load and temperature conditions; specifically it guarantees perfect lubrication between the hub and half pulley bushing resulting in extended maintenance intervals. MALOSSI 7.1 MHR GREASE is a high performance grease which combines mineral and synthetic oils, lithium complex soap thickener and anti-corrosion, anti-rust, anti-wear, and E.P. additives.

The chemical composition of this grease produces superior anti-corrosion and thermal/mechanical stress resistant properties, even at extreme operating conditions.

Specifications and Approvals

Meets or exceeds the following industry specifications:

- ISO 6743-9 L-XCCEB 2/1
- DIN 51502 KP 2/1 P -30

Features and Benefits

- Excellent protection against rust and corrosion and resistance to water wash out.
- Elevated dropping point.
- Excellent pumpability.
- Extended lubrication intervals translating into reduced operational costs.
- Compelling anti-corrosive characteristics of lubricated parts.

An important factor in selecting spark plugs, is heat range. This determines how quickly heat is conducted away from the spark plug's firing tip. Spark plugs operating at excessively high temperatures or at excessively low temperatures can create problems. The former does not allow the spark plug to cool sufficiently resulting in pre-ignition and the latter generates carbon deposit on the electrode. Denso operates between 400 and 900 degrees C, an ideal range that allows the spark plug to self-clean between combustion cycles.

This series offers:

- 1) Stronger sparks at lower voltages
- 2) Better firing performance and improved acceleration

Code	Price	Description

MALOSSİ GRIPS

suitable for all vehicles

The importance of grip is well known since the mists of time. Man has always strived to create safer and more effective grips on tools and weapons, without neglecting to personalise them, sometimes embellished with precious materials. At last today, your motorcycle too can have something special: Malossi took care of it!

A firm grip is never missing, palm and fingers grasp the grip to convey riding commands, sometimes gently, sometimes with great force, according to your temperament or to your mood, and the engine, producing a sound that is music to the ears of every rider that lives for the ride, responds to your input for performance and carries you into the wind.

Malossi grips have no competition when concerning your motorcycle ride: they are safe, anatomically comfortable, indestructible, and stylish too, because the care for aesthetics has never been of secondary importance to us!

Technical Characteristics :

- dual compound, dual hardness, dual colour;
- micro-pyramid pattern provides firm safe grip;
- chassis in semi-rigid torque-limited elastomer;
- top-quality material, special anti-allergy material;
- resistant to atmospheric agents, UV rays, ozone;
- anatomical shape and structure;
- two grooves for steel wire give extra security;
- length 125 mm, standard 22/24 mm diameter .
